Brain by EducAI

Product Description:

Brain is an all-in-one productivity platform designed to help your team work faster while keeping your most sensitive information completely private.

Core Features

- **Instant Document Creation:** Build complex, data-rich reports and spreadsheets with incredible speed and precision.
- **The "AI Boss":** Staff can chat with a custom AI trained directly on your real company data. It delivers lightning-fast, accurate guidance just like asking for leadership, but without the wait.
- **100% Local and Secure:** Your data never touches the public cloud. We provide a dedicated, multi-purpose server that lives right on your premises, ensuring complete data sovereignty and privacy.

Product Benefits:

- Brain will make document creation simpler and data-rich, improving employee productivity on time-consuming tasks.
- It will also let senior staff focus on more pressing issues rather than answering redundant questions.
- The server where Brain is hosted is completely local and secure. This prevents the company's data from falling into the wrong hands.
- The muilti-purpose server will allow the organization to create small scale internal-products and use AI without worrying about the AI usage costs (Unlimited tokens).

Product Implementation:

- **Discovery & Demonstration** We provide a comprehensive demo of Brain, showcasing the platform's data-rich document generation and the "AI Boss" capabilities in action.
- **Agreement & Contracting** Once the solution is validated for your organization's specific workflows, we finalize the partnership and execute the software and hardware agreements.
- **Hardware Deployment (2 Weeks)** Our team arrives on-site to physically deliver, install, and configure your dedicated multi-purpose server, establishing your fully local, air-gapped environment.
- **Data Integration & Staff Training (1 Week)** We dedicate a full week to hands-on onboarding. Our team helps you securely migrate your initial company data into the local system and thoroughly trains your staff on how to query the AI and add new data moving forward.
- **Five-Nines Reliability & Ongoing Support** Our engineering team remains on standby for rapid troubleshooting and maintenance, ensuring your on-premise servers consistently meet strict 99.999% (Five Nines) uptime compliance.
